

# Solids

Vetropieno Glass Bricks - a 100% solid glass block that combines the strength of traditional brick with the transparency and luminosity of glass. Unlike traditional products that are hollow inside, solid Vetropieno Glass Bricks deliver visual effects and movement created deep within the block that adds transparency, passage of light and new beauty to the usual properties of this construction element.

## Vetropieno Glass Bricks

Introduced by Seves Glass Block as part of the Design Collection, Vetropieno comes in four colors: Neutral, Blue, Nordica and Siena, and provides another glass solution for decorating interiors and exteriors, with a focus on the artistic and expressive possibilities of the material. It's an original alternative to classic blocks that has the ability to create stunning dividing walls that allow light to pass through into each room, or special design nuances that will add a touch of style, individuality and color.

The standard size and versatile shape allows it to be installed both horizontally and vertically creating smooth surfaces, traditional designs, delicate frames or colored light reflections. Vetropieno Glass Bricks have endless applications including bathrooms, kitchens, decorative columns, as well as interior and exterior pool areas, divider walls and railing structures.

Blue  
9.375" x 4.5" x 2"  
7.7 lbs

Neutral  
9.375" x 4.5" x 2"  
7.7 lbs

Blue  
4.65" x 4.5" x 2"  
3.75 lbs

Neutral  
4.65" x 4.5" x 2"  
3.75 lbs

Nordica  
9.375" x 4.5" x 2"  
7.7 lbs

Siena  
9.375" x 4.5" x 2"  
7.7 lbs

Nordica  
4.65" x 4.5" x 2"  
3.75 lbs

Siena  
4.65" x 4.5" x 2"  
3.75 lbs

Vetropieno can be installed using mortars or structural silicones. Unsupported areas should be limited to 40 s/f or less. Maximum dimensions either in height or width should not exceed 10 ft. Structural calculations may be required depending upon proposed application. Contact your SEVES Distributor for more information.

# Gridlock™

Seves Glass Block, in partnership with Extech's Gridlock™ Glass Block System (patent pending), give a new dimension to glass block wall installation. Virtually unbreakable 2" thick solid glass "snap-in blocks" simplify both installation and maintenance. Superior graffiti resistance protects against vandalism. Simple pressure wash cleaning is all you need for upkeep providing nearly zero maintenance. Numerous framing patterns and finishes let you create attractive walls that lock in long term performance!

## Seves Glass Block + Extech Gridlock™ Glass Block System

### The fastest way to install and repair a glass block wall

- Solid glass blocks (2" thickness) are practically unbreakable
- Anodized or painted rigid aluminum framing, provides unmatched durability and vandal resistance
- Glass offers superior graffiti resistance
- Nearly zero maintenance- simple pressure wash cleaning
- No ledges to collect dirt and debris
- Unlike mortared systems, joints will not deteriorate, effloresce, build-up dirt or discolor
- Fully gasketed joints

### Attractive and Smart

- Provides high degree of visual clarity for safety and security
- Outstanding light transmission
- Creative Art-in-Transit opportunities. (i.e. unlimited framing colors, etched or back screened glass blocks)
- Optional bond patterns available

### Flexible and Durable

- Light-weight, pre-fabricated aluminum frames are easily and quickly installed versus traditional mortar or heavy pre-glazed systems
- No exposed fasteners
- Individual 8" x 8" (nominal) glass block units simply snapped and permanently "locked" into place
- Can be adapted to various existing opening sizes
- Capable of long structural spans
- Simple block "snap-in to replace" eliminates need to remove sealants or adhesives
